SVM-PSC – Polyester resin for use in concrete

Bonded anchor with anchor rod made of galvanized steel or stainless steel of sizes M8 to M30 for use in non-cracked concrete

Basic product information

Features

- Several embedment depths
- ETAG 001-5 Option 7
- **STUD** – carbon steel, class 5.8 acc. EN ISO 898-1
- **STUD-88** – carbon steel , class 8.8 acc. EN ISO 898-1
  Coating thickness min. 5µm acc. EN ISO 4042
- **STUD-A4** – stainless steel, grade A4-70, A4-80 acc. EN ISO 3506
  Steel material 1.4401, 1.4404, 1.4571 acc. EN 10088

Substrate

- Non-cracked concrete C20/25 – C50/60
- Reinforced and unreinforced concrete
- Dry or wet concrete (Category 1)
- Flooded holes, except sea water (Category 2)

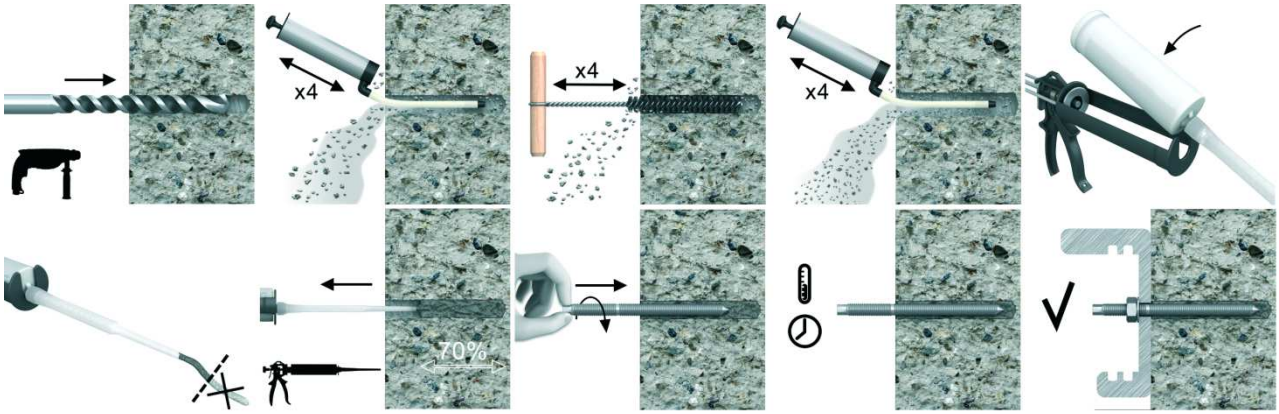
Installation guide



1. Drill hole to the correct diameter and depth for stud size being used.
2. Clean the hole with brush and hand pump at least four times each.
3. Insert cartridge into gun and attach nozzle.
4. Dispense to waste until an even color is obtained. Insert the mixing nozzle to the far end of the hole and inject the resin, slowly withdrawing the nozzle as the hole is filled to 70% of its depth.
5. Immediately insert the rod, slowly and with a slight twisting motion. Remove any excess resin around the hole before it sets and leave it undisturbed until the curing time elapses.
6. Attach fixture and tighten the nut to the required torque.
